

WellEngaged

Employee Benefits Education Program

- Allows the Benefit Counselor to present information from multiple enrollment tools or websites
- Uses a simple tab layout to seamlessly browse between programs
- Allows for data entry and reporting and includes customized forms and data capture and storage
- Helps employees 'Be Prepared for Healthcare' and collects important data for the employer regarding employee preferences for accessing care (optional)
- Provides employees with information and counseling about nearby facilities and doctors providing care at lower costs
- Increase participation in wellness and preventive care by assisting employees in selecting specific health improvement activity, supported by educational materials and follow-up. Cumulative participation data reported to the employer periodically.
- System is customizable and the client's desired topics can be covered

Dual View Enrollment System

- Improves employee engagement and visual participation in the enrollment process
- Provides a second portable monitor and wireless keyboard so that the employee participant has a viewing monitor dedicated for their use and a separate key board so that the employee can make entries when required
- Enhances the viewing experience and will also improve the confidentiality of employee entry
- Provides that only the employee screen is viewable when the two question quality survey is conducted at the end of the enrollment session. This will increase the confidentiality of the employee response during the quality assessment
